3. The figures show an increase under bulls and bullocks, cows and cow-buffaloes, while there has been a considerable decrease under "Young stock" sheep, goats and poultry. The increase under the three heads is, as pointed out by the Superintendent of Veterinary and Animal Husbandry Services, more illusory than real, as it is far below the increases from quinquennium to quinquennium and even the little increase is due to the preponderance of scrub cattle over useful ones. The small increase in cows is due to the prosperous milk trade, particularly in the Cities and round about the Military camps. During the latter part of the quinquennium, action was taken to regulate by order, under the Defence of India Rules, the movement and export of cattle and the slaughter of cattle and to control the consumption of meat by a special Control Order. The decrease under sheep, goats and poultry is said to be due to the increased demands for consumption particularly by the Military Authorities.

4. The position in regard to cattle in the State was rapidly surveyed by Major Simpson and Government have passed their orders in Government Order No. S. D. 781-91—C. 120-44-47, dated 1st August 1945, approving of some of his recommendations with a view to arresting the further deterioration of the cattle wealth in the State and to improving and conserving the really useful stock. The main recommendations approved by Government were the following :—

(1) The minimum slaughter age of cows and the buffaloes was raised to fifteen years.

(2) Bulls, bullocks and he-buffaloes under ten years of age were permitted to be slaughtered on the certificate of a Veterinary Officer that they are unfit for any other purpose.

(3) The ban on the export of working aminals was continued.

(4) About a dozen cattle fairs were ordered to be held every year at suitable time and places, sales at these fairs being registered.

(5) The movement of cattle from the interior of the State to the border taluks were ordered to be controlled.

5. The increase under iron ploughs though not marked is a satisfactory feature, being due to the propaganda carried on by the Agricultural Department and the example set by persons who have taken to more advanced methods of cultivation.

6. It is noteworthy that there is a marked increase in the case of tractors and power-worked sugarcane crushers.
